PROFESSIONAL SUMMARY

Computer Science Engineering student with hands-on experience in Python, SQL, and data analysis, complemented by industry exposure through an SAP-based internship. Skilled in building data pipelines, performing exploratory data analysis, and developing machine learning-driven solutions, seeking SAP BTP, cloud analytics, and data engineering opportunities.

CORE SKILLS

AI & ML: Machine Learning, Data Preprocessing, Model Evaluation and Training

SAP Technologies: SAP HANA Cloud, SAP Analytics Cloud (SAC),

Programming: Python, SQL,

Libraries: NumPy, Pandas, Seaborn, Matplotlib

MLOps & Workflow: ML flow, DagsHub

Tools & Platforms: Docker, Git, GitHub, VS Code, Jupyter Notebook

EDUCATION

Brindavan College of Engineering, Bangalore, Karnataka

Bachelor of Engineering in Computer Science and Engineering

Nov 2022 – Present

Vidya P. Hanchinmani PU College, Dharwad, Karnataka Pre-University

July 2020 – April 2022

PROJECTS

Early Detection of Osteoarthritis Using Smart Shoe

Technologies: Python, SQLite, Machine learning Algorithm Such as KNN, Random forest, SVM

- Developed a smart shoe-based system for early detection of Osteoarthritis using embedded sensors to monitor gait patterns. The project integrates data acquisition, preprocessing, and machine learning algorithms to identify abnormal joint behavior and achieving ~85% accuracy for gait anomaly detection, aiming to provide a non-invasive and cost-effective diagnostic aid.

Alumni Management System Using Machine Learning

Technologies: Python, Machine learning, SQL lite

- Developed a machine learning-based alumni management system to organize alumni data and intelligently match students with relevant alumni based on skills, department, and interests. Implemented data preprocessing and similarity-based algorithms to improve mentor recommendations and alumni-student connectivity.

INTERNSHIP

SAP Edunet Industry Internship Program (Ongoing)

- Building ETL pipelines using **Apache Airflow and PySpark** for data processing workflows
 - Working with **SAP BTP and HANA Cloud** to manage and analyze structured datasets
 - Developing **Power BI dashboards** for data visualization and reporting
 - Implemented basic **ML experiment tracking using MLflow**
-

CERTIFICATIONS

SAP Learning – ABAP Programming

SAP Learning – S/4HANA Extensibility

SAP Learning – ABAP Cloud
